DETAILED ACTION

Drawings

1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The rejection is respectfully maintained and incorporated by reference as set forth in the last office action, paper number 4, mailed on July 8, 2002.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-4, 6, 8, 9, 15, 16, 17, 23, and 24 are rejected under 35 U.S.C. 102(a) as being anticipated by Kitamura, EP 0942603A2 as labeled document I in Applicant's IDS.
7. The rejections are respectfully maintained and incorporated by reference as set forth in the last office action, paper number 4, mailed on July 8, 2002.

Claim Rejections - 35 USC § 103

Art Unit: 2183

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 5, 7, 14, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitamura, EP 0942603A2 as labeled document I in Applicant's IDS.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kitamura, EP 0942603A2 as labeled document I in Applicant's IDS in view of Whittaker et al., U.S. Patent Number 5,968,167.

10. Claims 11-13 and 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitamura, EP 0942603A2 as labeled document I in Applicant's IDS in view of Nakagawa et al., U.S. Patent Number 5,241,679.

11. The rejections are respectfully maintained and incorporated by reference as set forth in the last office action, paper number 4, mailed on July 8, 2002.

Response to Arguments

12. Applicant's arguments filed August 14, 2002, have been fully considered but they are not persuasive.

13. On page 2, Applicants argue in essence:

"Claim 1 was rejected under section 102 as being anticipated by Kitamura. It is indicated that Kitamura teaches a mathematical processor, namely element 5, in Figure 6. However, as indicated in column 11 of Kitamura, paragraph 39, beginning at line 47, the data processing unit 5 splices the video data DA and DB in response to a splicing instruction from CPU 7. There is absolutely no indication that this device can be considered to be a mathematical processor... Similarly, claim 16 calls for using a third processor for mathematical operations. No such thing is shown in Kitamura."

Art Unit: 2183

14. However, "Mathematics" as defined by Merriam-Webster's Collegiate Dictionary, Tenth Edition is

" the science of numbers and their operations, interrelations, combinations, generalizations, and abstractions and of space configurations and their structure, measurement, transformations, and generalizations. "

15. Kitamura has taught that data processing unit 5 splices the video data DA and DB in response to a splicing instruction. DA and DB are encoded video data, which are combinations of bits, or numbers. (Kitamura, Column 11, lines 20-25) Since the data processing unit 5, operates on, or splices DA and DB, the data processing unit, as taught by Kitamura, is a mathematical processor.

Conclusion

16. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
